

SHELMARC
C A R P E T S
A Perfect Flooring Company

Product Catalog

TEXTURES · PATTERNS · COLORS

Shelmarc has combined these three major elements to make over 250 of the most advanced floor covering products available today. All of the products featured in this catalog are stocked and available in rolls or cuts.

TEXTURES:

Shelmarc creates its textures in many different ways. With our tufting equipment we create unique products that are far from ordinary and plain. We design products with multiple pile heights and multiple ends of yarn per needle. With our advanced computer-controlled tufting machines we can create unlimited textures, and with the mixture of multiple yarn sizes, our textures give us limitless designs.

PATTERNS:

Shelmarc uses the latest in tufting manufacturing equipment to design its running line products. The products featured in our running line collection are among the most advanced patterns available in the floor covering industry today. If you cannot find the pattern you need in our running line program then our custom design department can create virtually any pattern you would require to make your room complete.

COLORS:

Shelmarc has approximately 360 colors in its solution dyed nylon color bank for designers to work with to create a one of a kind floor covering for their clients. Also, by special heat-setting and custom twisting of different colors Shelmarc can achieve almost limitless color selections. Do not be afraid of mixing colors. By being bold and daring not only will you have a floor covering that will perform under heavy traffic, but because the color is being extruded into the yarn the stain proofing is built into the carpet. Color is the most important element of any design, and getting the color right brings everything else into place and complete your design.

CUSTOM OPTIONS:

Everyone wants options and Shelmarc gives its customers every option available. If you are working on a design for a new property, or an existing property that needs a redesign, then our design department can help you achieve the floor covering to complete your one-of-a-kind artwork for the floor. Shelmarc will work with you to create a strike-off of your design. With our custom options there is no job too small or too large. Let us help bring your imagination to life.

SAMPLE DEPARTMENT:

Shelmarc offers complimentary 9" x 9" sample swatches of our products for customers at no charge. For a larger bound sample or a complete set of one of our styles for your showroom, please contact your representative or our customer service department for pricing.

SHELMARC MANAGEMENT:

Our management team would like to thank you for taking the time to view our products. We pride ourselves on customer satisfaction, so please contact us with any questions you may have about us or our products. You may also view our products on our website (www.shelmarccarpets.com). Thank you for giving us the opportunity to provide you with a quality floor covering.

SHELMARC CARPETS IS EXCITED TO BE PRESENTING ITS PRODUCT CATALOG. THE FOLLOWING PAGES WILL PROVIDE YOU WITH THE LATEST TEXTURE, PATTERN, AND COLOR DESIGNS. PLEASE REVIEW THE FOLLOWING COLLECTIONS FOR EXCITING NEW PRODUCTS FOR TODAY'S DEMANDING FLOORS.

PRINTED CARPET DESIGN SOLUTIONS

4-24

Shelmarc offers a large selection of affordable and bold print carpet products. From fun and sassy to modern renaissance, we have a pattern to complement your needs and budget.

ENHANCED LOOP PILES (TIP SHEARED)

83-100

1/8 and 1/10th gauge styles made on enhanced tufting machines that create intricate designs and patterns.

CARPET TILES

25-49

The fastest growing flooring segment. We have created popular designs to fit today's interior designs.

CUT & LOOP PILE SCROLL

101-105

1/10th and 1/12th gauge machines that have large scaled capabilities for floor designs that make a statement in any room.

HIGH DEFINITION COLLECTION

50-63

Our High Definition Collection was designed to stimulate your visual senses without sacrificing durability. These styles are some of the most reliable products on the market today.

WEAVE OVER WEAVE COLLECTION

106-109

The Weave Over Weave products offer several different options, allowing customers to create a custom look out of running line products.

CUT PILES

64-71

1/10 - Gauge Cut Piles piece dyed styles & solution dyed nylon to coordinate well with pattern goods.

CARPET PAD

110

PAD: Synthetic Pad for all applications
27 oz -32 oz. - 40 oz - carpet pad is designed to help extend the life of carpet.

LOOP PILES

72-81

For high traffic areas, Loop Piles perform best. Several styles and patterns to work with.

INSTALLATION INSTRUCTIONS

111-112

Helpful information to assist with the carpet installation.

PCU (PRECISION CUT & LOOP)

82

1/8th Gauge Cut Loop Style - used in light to moderate traffic areas.

INDEX & SPECIFICATIONS & COVE BASE

113-118

Quick reference to specs for each style and location of styles in the catalog. Cove Base: Used to add design style to all rooms.

CARPET PADDING

FOUNDATIONS

A COMPLETE LINE OF CARPET CUSHION FOR RESIDENTIAL AND COMMERCIAL APPLICATIONS
ECO-VERT FIBER CUSHION COLLECTION MANUFACTURED WITH RECYCLED MATERIAL.

- ENVIRONMENTALLY FRIENDLY
- EASY TO INSTALL AND MAINTAIN
- DURABLE

FOUNDATIONS ADVANTAGES:

CONSISTENT THICKNESS AND DENSITY • PROVIDES THERMAL INSULATION • IMPROVES ACOUSTICS AND REDUCES NOISE • MAY BE USED WITH CONVENTIONAL AND RADIANT HEATING SYSTEMS • MEETS AND EXCEEDS HUD-FHA REQUIREMENTS • MEETS THE CARPET CUSHION COUNCIL REQUIREMENTS.

INSTALLATION INSTRUCTIONS

for Patterned / Graphics Carpet

READ THIS CAREFULLY BEFORE INSTALLING ANY GRAPHIC CARPET

NO CLAIM WILL BE CONSIDERED FOR ROLL CRUSH OF OLEFIN FABRICS AS THIS IS A CHARACTERISTIC OF THE FIBER.

ALL CARPET SHOULD BE ROLLED OUT AND STORED AT 70° OR MORE FOR A MINIMUM OF TWENTY FOUR HOURS PRIOR TO INSTALLATION. READ ALL INSTRUCTIONS PRIOR TO BEGINNING ANY INSTALLATION.

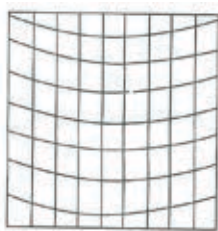

IF MATERIAL HAS BEEN CUT, FITTED OR INSTALLED NO ADJUSTMENTS OR CLAIMS WILL BE CONSIDERED FOR ANY OF THE ABOVE REASONS.

REMEMBER: IF YOU DON'T HAVE TIME TO DO IT RIGHT, YOU SURELY DON'T HAVE TIME TO DO IT OVER!

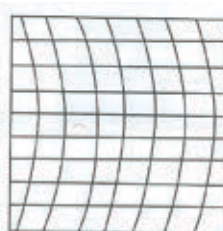

All patterned carpet is subject to certain industry tolerances. We feel our tolerances are more stringent than standard industry tolerances. Our tolerances are as follows:

NOTE: Stop installation and contact mill if the following tolerances have been exceeded.

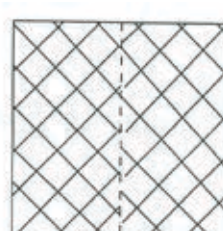

1. If bowing is greater than 1 1/2 inch in 12 foot width or 1 1/2 inch in 30 foot length.
2. If Pattern Elongation is more than an average of the following:
 - A. On patterns with repeats of less than 4" the tolerances is up to 2" per 12 feet.
 - B. On patterns with repeats of from 4" to 8" the tolerance is up to 1 pattern in 30".

#1 BOW WIDTH

#2 BOW LENGTH

#3 PATTERN ELONGATION

WE DO NOT GUARANTEE PATTERN REPEAT MATCH

HOW TO: TRIM PATTERN

On all Graphics items, it is extremely fundamental to know that the pattern is actually tufted into the carpet, not printed on. Because of this tufted-in characteristic, the pattern and the rows must line up. You must cut the center row of a diamond pattern and follow that row—regardless of how far you travel—that row will fall in exactly the same place in the pattern every time it repeats.

Because of the tufted pattern characteristics, it is most helpful to use a blunt object (screwdriver, awl, etc.) to open up the row prior to using a row cutter to follow the row, thus cutting the pattern in exactly the same place each time. (*If the pattern is not cut on the row, it will not match! Chalk line, straight-edge, or free hand cuts are not recommended and will not achieve a match!)

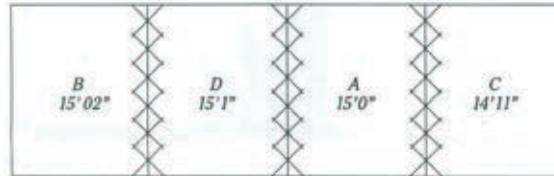

INSTALLATION CONT.

HOW TO: MATCH PATTERN (CORRECTION FOR PATTERN ELONGATION)

Once the patterned carpet has been trimmed in the proper fashion (always use center of diamond patterns):

1. An easy way to determine which cuts will match best is to cut off 30 patterns and compare the measurements to determine sequence.

EXAMPLE: DROP:	A	30 patterns measure 15'0"	The proper judgment in this example is to place the drops as follows to diminish the pattern elongation 14'11", 15'0", 15'1", 15'2".
	B	30 patterns measure 15'2"	
	C	30 patterns measure 14'11"	
	D	30 patterns measure 15'1"	

In this example, the elongation from least to greatest is 3" or 1/6%. Experience has shown that most carpets easily stretch 1/5% - 2% with a power stretcher. The deviation between Drop A and Drop C is only 1/2 of 1%.

2. Dry fit all pieces prior to beginning installation.
3. Cut 24 hours in advance if possible. This allows the carpet to relax.
4. If pattern is only slightly off, tightly rolling the (short side) drops face out and leaving rolled for 24 hours can help.
5. Match all patterns in center of seams and work toward ends.
6. If you are missing dye lots, do not expect color or pattern to match.

THE PROCEDURE

First, determine the short patterned and long patterned side. Since there is no dependable way to shrink a synthetic tufted carpet, we must use a process we do know—Stretching. We are simply going to stretch the short pattern side out to meet the long pattern, so:

In Glue Down Installations:

1. Glue long pattern drop in place approximately 4' - 6' wide and full length using approved adhesive.
2. Starting from center of seam (and start with center panel if more than two panels are involved), glue as far toward each end as the pattern matches and 4' - 6' wide on the short pattern drop.
3. Seal all seams with good quality seam sealer.
4. Place carpet in adhesive making seam only as far as match will allow.
5. Roll with lino roller and allow to set up 15-30 minutes. Stay-tacking may also be helpful.
6. Roll the side with short pattern up from the ends toward center until you come back to the glued areas.
7. Glue 8' - 10' length by 4' - 6' width (or as much as you feel comfortable with).
8. Unroll carpet into adhesive. As long as adhesive is wet, it is slippery, not tacky, this will aid in step #9.
9. Using power stretcher (not kicker), stretch pattern into register roll and stay-tack (two-head power stretcher works great, one head on each end).
10. Repeat steps 6-9 until seam is complete. Leave stay nails in place until glue sets.
11. Use this procedure on each of the other seams.
12. The best way to determine pattern match is to stand back and sight down diagonals formed by pattern.

* Remember we can only stretch the short side (not shrink the long side). Lay out all work so this can be accomplished. Never glue the short side first. Use of the power stretcher is basic to the installation of all carpet. A knee kicker can't obtain and hold the necessary amounts of stretch. Failure to use a power stretcher is the major cause of having to re-stretch!

In Stretch Installations:

1. Loose lay all drops in place in proper sequence (see#1) - Correction For Pattern Elongation Procedure).
2. Trip and prepare seams per instruction.
3. Once long and short side is determined, use two-headed power stretcher (one head on each end) on short side to match pattern.
4. As always, begin pattern matching in center of the drop. This divides the pattern elongation and makes for less work.
5. Run hot melt seam, making minor adjustments with knee kicker. Run short lengths of seam if necessary. Allow to cool and readjust as needed.
6. The best way to determine pattern match is to stand back and sight down diagonals formed by pattern.
